SECTION 3

OBJECTIVE OF WORK PERFORMED

3.1 SUBSTANCES SOUGHT

| |
|--|
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |

3.2 GEOLOGICAL SETTING OF EXPLORED AREA

Highlight the favourable elements that may lead up to the discovery of mineral substances sought after

| |
|--|
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |

3.3 NEW DISCOVERY (indicator)

Yes No

| |
|--|
| |
| |
| |

| |
| |
| |
| |
| |
| |
| |

A.1 DATE OF WORK CARRYING OUT

Start of work program

| | | |
|--|--|--|
| | | |
|--|--|--|

Year Month Day

End of work program

| | | |
|--|--|--|
| | | |
|--|--|--|

Year Month Day

A.2 LAND PARCEL SUBJECT TO MINING WORK

Total distance covered in kilometers :

Total surface area covered in square kilometers:

A.3 ROCK TYPE(S)

| |
|--|
| |
| |
| |

A.4 DESCRIPTION OF PRINCIPAL MINERALIZATIONS

| |
|--|
| |
| |
| |
| |
| |
| |

A.5 GEOPHYSICAL EXPLORATORY SURVEY

| Technique | Instrument | Distance covered |
|-----------|------------|------------------|
| Beep mat | | Km |
| VLF | | Km |
| MAG | | Km |

A.6 ANOMALIES AND CONDUCTORS

Write the results obtained from work performed

| |
|--|
| |
| |
| |
| |

A.7 ANALYTICAL RESULTS

If the analyses have been performed by a laboratory, write the significant results

| |
|--|
| |
| |
| |
| |

A.8 IDENTIFICATION OF QUALIFIED PROFESSIONAL WHO SUPERVISED THE WORK PROGRAM

| | | | | | |
|--|---------|----------------|--------------------------|----------------------------|------|
| Name | | First name | | | |
| | | | | | |
| Address (number, street, R.R. or P.O. box) | | | App. | City, town or municipality | |
| | | | | | |
| Province | Country | Postal code | Area c. Telephone (home) | Area c. Telephone (office) | Ext. |
| | | | | | |
| Area c. Fax | | E-mail address | | | |
| | | | | | |

I hereby declare that the work program consisting in the exploration and examination of rock outcrops and erratic boulders as reported in this form has been carried out under my supervision.

A.9 DOCUMENTS TO ATTACH

- A map showing the location of rock outcrops, mineralizations, anomalies, conductors and, where applicable, analyzed samples. The four corners should be identified using geographic coordinates (latitude, longitude) or UTM coordinates (Universal Transverse Mercator), as well as the selected mode (NAD27 or NAD83) in accordance with the National Topographic System of Canada (NTS)
- The analyses certificates listing the complete results obtained for each sample with sample numbers corresponding to the numbers indicated on the map. The analyses certificates must be dated and signed by the laboratory supervisor where the analyses have been performed.
- A map of mining rights at a scale of 1:50,000 showing the mining property and the perimeter of the work program.

B.1 DATE OF WORK CARRYING OUT

Start of work program

End of work program

| | | |
|------|-------|-----|
| | | |
| Year | Month | Day |

| | | |
|------|-------|-----|
| | | |
| Year | Month | Day |

B.2 WORK PERFORMED

Number of stripped outcrops :

Total stripped surface area in square meters (m²) :

Number of trenches :

| Trench stripping/ number | UTM Coordinates (Nad 27/83) or geographical | Length (m) | Width (m) | Depth (trench) (m) |
|-----------------------------|--|---------------|--------------|--------------------------|
| | | | | |
| | | | | |
| | | | | |
| | | | | |
| | | | | |

B.3 GEOLOGICAL DATA OBSERVED IN EACH TRENCH AND EACH STRIPPED OUTCROP

Rock type, structure, alterations and mineralizations

| |
|--|
| |
| |
| |
| |
| |
| |

B.4 ANALYTICAL RESULTS

B.4.1 Collected chosen samples

If analyses have been performed by a laboratory, write the significant results.

| |
|--|
| |
| |
| |
| |
| |

B.4.2 Channel samples

| |
|--|
| |
| |
| |
| |
| |

B.5 DOCUMENTS TO ATTACH

- A map and, where applicable, plans drawn at a scale showing the location of stripped areas and trenches and identifying the geological features and analyzed samples. The map and plans should be identified, at the four corners using geographic coordinates (latitude, longitude) or UTM coordinates (Universel Transverse de Mercator), as well as the selected mode (NAD27 or NAD83) in accordance with the National Topographic System of Canada (NTS).
- The analyses certificates listing the complete results obtained for each sample with sample numbers corresponding to the numbers indicated on the map and sketches. The analyses certificates must be dated and signed by the laboratory supervisor where the analyses have been performed.
- A map of mining rights at a scale of 1:50 000 showing the mining property and the perimeter of the work program.

D.1 DATE OF WORK CARRYING OUT

Start of work program

| | | |
|------|-------|-----|
| | | |
| Year | Month | Day |

End of work program

| | | |
|------|-------|-----|
| | | |
| Year | Month | Day |

D.2 DIMENSIONS

Size of collected blocks

| |
|--|
| |
| |
| |

AND/OR

Dimensions of open face

| N° | Length (m) | Width (m) | Height (m) |
|----|------------|-----------|------------|
| | | | |
| | | | |
| | | | |

D.3 PHYSICAL AND ESTHETIC CHARACTERISTICS OF THE ROCK

Rock type :

Color and depth alteration of the rock:

Color on fresh or polished surface:

Grain size:

Spacing of joints :

Percentage of enclaves:

Mineral agglomerates (%) :

Presence of veins or dykes (%) :

D.4 OTHER GEOLOGICAL DATA OBSERVED

| |
|--|
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |

D.5 ANALYTICAL RESULTS AND ASTM TESTS (where applicable)

| |
|--|
| |
| |
| |
| |
| |
| |
| |
| |
| |
| |

D.7 DOCUMENTS TO ATTACH

- A map and, where applicable, plans drawn at a scale showing the location of mine front and block sampling site and identifying the geological features and analyzed samples. The four corners of the map and plans should be identified, using geographical coordinates (latitude, longitude) or UTM coordinates (Universal Transverse de Mercator), as well as the selected mode (NAD27 or NAD83) in accordance with the National Topographic System of Canada (NTS).
- A map of mining rights at a scale of 1:50,000 showing the mining property and the perimeter of the work program.
